

Dear International students of Engineering and Science,

Hello! This is TAIYO JOB Office. We support job hunting for foreign students.

The job selection of companies in Japan will start from 1st March. Do you have sufficient information of the companies that recruit foreign students?

After finishing the final exam in February, why don't you join our JOB FAIR which provides foreign students advantage in job hunting?

On 17th (Thu) and 19th (Sat) February, we are organizing "Early Bird Job Fair 2023" limited only for international students of Engineering and Science.

" Eight global companies that actively recruit international students of Engineering and Science students will participate in this event.

" Especially for international students who would like to acquire technical skills of the world's top level

>> We are organizing this event online. If you have internet access, you can join from wherever you are (Even though you are outside of Japan!)

>> Also, senior international students who joined the event last year have received job offers from the participating companies!

<<Day 1 17th February (Thu) Company information >>

1、 Hitachi Metals,Ltd. <http://www.hitachi-metals.co.jp/e/index.html> <<http://www.hitachi-metals.co.jp/e/index.html>>

+++[Metal Products／Non-ferrous metals／Automobiles／Automotive parts]

<Looking for students who major in> Mechanical, Electrical and electronic, Information, Chemical, Materials and etc.

▼ The world's top class of high-performance materials!

The company has provided materials and components such as automobiles, electronics and infrastructure around the world. With world's leading brand, this global company is playing a major role in a wide range of industries!

2、 Nifco Inc. <https://www.nifco.com/en/> <<https://www.nifco.com/en/>>

+++[Automobiles／Home appliances and AV equipment／Interior design]

<Looking for students who major in> Mechanical, Electrical and electronic, Information, System Control, Chemical, Materials, Biology, and etc.

▼ The component manufacturer that is essential to the world's automobile manufacturer!

The company possesses approximately 3,600 patents worldwide and continuously develop 4,000 new products yearly! In one car, there are more than 700 parts manufactured by Nifco! "From Japan's Nifco to the world's Nifco!"

Nifco is supplying products to automobile manufacturers all over the worlds.

3、 Mitsubishi Materials Corporation

<https://www.mmc.co.jp/corporate/en/> <<https://www.mmc.co.jp/corporate/en/>>

+ + + [Non-ferrous metals／Machine parts／Electronic materials／Carbide tools／Equipment for facilities and construction]

<Looking for students who major in> Chemical, Chemical Engineering, Materials, Metallurgical, Mathematics, Physics, Geology, Natural resources, Electrical, Civil engineering, Architecture, Nuclear, Information, Management, and etc.

▼ We are a comprehensive materials manufacturer that represents Japan and the world!

<No.1 Domestic Businesses in>

- ① Cemented carbide tools for automotive, aircraft, and medical industries
- ② Production capacity of cement plants
- ③ Quantity of the home appliance recycle management

<No.1 World Businesses in>

- ① Copper processing business: Quantity of oxygen-free copper production
- ② Electronic material business : Specific products for smartphones
- ③ Quantity of E-Scrap Recycle management

4 、 UBE Industries,Ltd. <https://www.ube-ind.co.jp/ube/en/index.html> <<https://www.ube-ind.co.jp/ube/en/index.html>>

+++ [Chemical / Semiconductor and electronic part / Building materials and exteriors / Pharmaceutical products / Equipment and facility construction]

<Looking for students who major in> Chemical, Biology, Chemical Engineering, Mechanical, Electrical and electronic, Information, Architecture, Civil engineering

▼ Japan's leading comprehensive chemical manufacturers!

We provide a wide range of value to society through our three businesses: 『Chemistry』 『Construction materials』 『Machinery』

In the future, we will include the fields of pharmaceuticals, aerospace materials, batter materials, fragrances, as well as energy and environment.

We will pursue specialty chemicals and fine chemicals with our unique technologies and aim to make further progress on the world stage.
